PAST PROJECTS

Project: Blog-App

Description: Developed a dynamic blog application using EJS, Express.js, Node.js, and CSS. The app allows users to create, edit, and delete blog posts. Implemented server-side rendering with EJS templates and managed routing with Express.js. Ensured a responsive and user-friendly interface with custom CSS.

Technologies:

- EJS
 - Express.js
 - Node.js
 - CSS
-

Project: Capstone Project 1

Description: Created a comprehensive personal portfolio as part of a capstone project. The portfolio showcases my skills, projects, and experiences in web development. It includes sections such as About Me, Projects, and Contact, and is designed to provide a professional online presence.

Technologies:

- HTML
 - CSS
-

Project: Portfolio

Description: Designed a minimalist and responsive personal portfolio using only HTML and CSS. The portfolio highlights my web development projects and professional background. Focused on clean design principles and ease of navigation to enhance user experience.

Technologies:

- HTML
 - CSS
-

Project: Maths Game

Description: Developed an interactive multiplication game to aid in learning math skills. The game, built with HTML, JavaScript, and CSS, provides users with random multiplication problems and immediate feedback on their answers. Designed to be engaging and educational for users of all ages.

Technologies:

- HTML
 - JavaScript
 - CSS
-

Project: AirBNB Collaboration

Description: Participated in a collaborative project during my program with ALX to develop a mock version of the AirBNB website. Worked with a team to implement key features such as property listings, user authentication, and booking functionality. Gained experience in teamwork and project management.

Technologies:

- Various web development technologies were used.
-

Project: RobotProject

Description: Created an interactive robot-themed web project using HTML, CSS, and JavaScript. The project features a virtual robot that responds to user inputs, demonstrating basic principles of animation and interactivity in web development.

Technologies:

- HTML
 - CSS
 - JavaScript
-

Project: Obiodu - Online Library

Description: Developed an online library platform for educational purposes named Obiodu. The platform allows users to access and manage educational resources. Implemented key features such as user registration, resource uploading, and search functionality to enhance the learning experience.

Technologies:

- Various web development technologies were used
